

Michael Gillett

Full Stack Software Developer

(503) 616-8021
michaelgillett19@gmail.com

github.com/gillemic
<https://www.michaelgillett.dev>

SKILLS

Languages

Python, Javascript, C#, HTML/CSS

Technologies

Git, NodeJS, ReactJS, Django, .NET Core, Netlify

EXPERIENCE

Office Temp, Aerotek

Beaverton, OR

OCTOBER 2019 - FEBRUARY 2020

Fulfilled general office duties such as: answering phones, customer service, opening and sorting mail, data entry using JDA inventory management and Microsoft Excel, and basic photo editing

Sugoi Sushi, Sushi Chef

Corvallis, OR

SEPTEMBER 2017 - MARCH 2019

Made sushi for 6-12 hours per shift while also maintaining a clean workspace, seating customers, answering questions, keeping a positive attitude, and training new employees

EDUCATION

Oregon State University - *Bachelor's Degree in Computer Science*

Graduated in June 2019 with a focus on Computer Systems. This degree included additional courses about many underlying computing technologies and their history, such as processors, compilers, x86 Assembly language, and the low-level Haskell language

PROJECTS

Tut-Tut, The Internet of Things (IoT) Rainfall Detector

Senior Project at Oregon State University. With three members in total, we built an internet-connected device that used a piezoelectric sensor wired to an Adafruit Feather M0 microcontroller (programmed in C) to detect the rate and intensity of falling rain.

Personal Website

Website written in ReactJS and hosted on AWS Amplify for personal use. Currently has a todo-list app, a page embedded with a resume, and a tetris game. More will be added as I work on more portfolio projects.

Tormar

Website also written in ReactJS for my father's concrete business, currently in development but will be a multi-page application containing company history, contact information, areas of service, and a gallery showcasing past projects. Will be hosted on Netlify.
